Dear colleague,

Agence universitaire de la Francophonie (AUF) and University POLITEHNICA of Bucharest (UPB) invites students from your university to register for the 2nd edition Summer School webinars&competition to be held between 6-8 July 2020.

With the current unprecedented challenges, we will live stream the whole event as an online replacement for this year's Summer School.

The 3-day event will consist of two webinars focused on Sustainable Development and a competition dedicated to the students from the AUF member universities.

**Monday, 6 July:** Smart Cities for Sustainable Development

**Tuesday, 7 July:** Community Engagement: Success stories

**Wednesday, 8 July:** Competition Winners Announcement & Project Presentations

Through this competition we launch the challenge to our students to come up with innovative and sustainable projects, that would allow the decrease of the amount of waste, as well as their recycling/reuse in order to accelerate the transition to CIRCULAR ECONOMY.

To register for the AUF&UPB Summer School, the students will access the website of the event <https://upbaufsummerschool.com/> The website contains all the necessary information (registration form, programme, competition details etc.). Participation is **free of charge**.

We would be grateful if you could share this invitation among your students.

Thank you for your support and we look forward to a successful event.

Mohamed Ketata  
Directeur régional AUF ECO

Mihnea Costoiu  
Rector
