|                                                 | Recommended |  |

| General objective <sup>6</sup>   | Developing professional skills in the field of mechanical engineering.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |  |  |  |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|--|
| Specific objectives <sup>7</sup> | <ul> <li>After successful graduation of this discipline, students will be able to:</li> <li>Know in-details the activities carried out by the unit at which the practical training is carried out;</li> <li>Apply the theoretical knowledge acquired at the specialty disciplines (DS) in the manufacturing process or experimental processes, supervised/realized in the unit in which the practical training takes place.</li> <li>Identify in practice the elements studied at the disciplines in the specialty.</li> <li>Use basic practical skills, knowledge, criteria and methods in the field of Mechanical Engineering.</li> </ul> |  |  |  |  |
| Course description <sup>8</sup>  | <ul> <li>"Domain Practical Training" can be followed in two ways:</li> <li>1. In a organizing institution according to the practical conventions.</li> <li>2. In faculty laboratories, according to the course guide detailed form.</li> <li>The "Domain practical training" period must be fixed according to the TUIASI-Academic Schedule.</li> </ul>                                                                                                                                                                                                                                                                                     |  |  |  |  |

| Assessment                                                 |                                                                                                                                                                                                                                      | Schedule <sup>9</sup> |         | Percentage of the final grade (minimum grade) <sup>10</sup> |  |  |

<sup>&</sup>lt;sup>1</sup>Course name from the curriculum

 $<sup>^{2}</sup>$  DF – fundamental, DD – in the field, DS – specialty, DC – complementary (from the curriculum)  $^{3}$  DI – imposed, DO –optional, DL – facultative (from the curriculum)

<sup>&</sup>lt;sup>4</sup> Points 3.8, 3.5, 3.6a,b,c, 3.7 from the Course guide – extended form (L-lecture, T-tutorial, LB-laboratory works, Pproject, IS-individual study)

<sup>11</sup> Exam or colloquium

<sup>&</sup>lt;sup>5</sup> According to 4.1 – Pre-requisites - from the Course guide – extended form
<sup>6</sup> According to 7.1 from the Course guide – extended form
<sup>7</sup> According to 7.2 from the Course guide – extended form
<sup>8</sup> Short description of the course, according to point 8 from the Course guide – extended form

<sup>&</sup>lt;sup>9</sup> For continuous assessment: weeks 1 - 14, for final assessment – colloquium: week 14, for final assessment-exam: exam period

<sup>&</sup>lt;sup>10</sup> A minimum grade might be imposed for some assessment stages
